Risk in Innovation

Health Innovation Assessment Portal

IRIC

NHS National Services Scotland

It's new.....

It's change.....

It's needed- Risk of not doing it is greater than risk of doing it...

- Solutions to challenges identified by the public sector. Well known fears over the current pressures and future sustainability of our NHS
  - Growing population,
  - longer life expectancy,
  - cost of running and providing clinical services

Less well known "90% of all medicines work for 30-50% of all patients". = Need for Precision Medicine and AI

- Internal NHS Staff/ department -need identified in day to day work
- Supplier approach to adverse incidents or product improvement
- Key Source of economic growth and job creation

Minimising risk of Innovation

Health Innovation Assessment Portal

IRIC

NHS National Services Scotland

- Establishing support and buy in from users and budget holders
- Consult widely with the right stakeholders to determine specifications and requirements
- Clinical evidence- Determine efficacy using trials, test beds, HTA's etc
- Certification and Registration- Ensure relevant CE marking is applied.
- Apply policy and procedure e.g. Policy for use, Procedure for procurement

What's on Offer ?

Health Innovation Assessment Portal

IRIC NHS National Services Scotland

Lots of questions.....

Examples of what works....

Models of how it works.....

Links with..... Chief Scientist Office, part of SG, Innovation Leads Group, Test Bed Governance Group, SHTG, SHIL and CivTech. Academic institutions and industry.

Those rule things...
