

## Important Information for NPCCD Medical

---

Following New CHI go live in November NPCCD is the primary source of Practice and GP data for CHI. We would like to remind you that it is important to keep NPCCD updated after any GP or Practice changes. Ideally, this should be done in sync with any updates made to the GP IT system.

---

If you have any questions/queries, contact the NPCCD team

# NPCCD

## Newsletter for GPs and Optometrists December 2023

### NPCCD - National Primary Care Clinician Database

### NPCCD Key Developments:

#### Medical

- New CHI went live on 1<sup>st</sup> November 2023
- Currently Business as Usual
- Continual improvements to the live medical functionality

#### Ophthalmic

- Cleansing of NPCCD Ophthalmic data is nearing its conclusion and is forecast to be complete in January
- Work is underway to develop functionality within NPCCD Ophthalmic to give optometrists access to the data held about them on the system
- Testing on this with some volunteer optometrists is scheduled to occur in January

#### Dental

- The NPCCD project continues to grow by building support for a third specialty - Dentistry.
- The Dental Project team have been focused on building the first key functional areas - management of Dental Practitioner records, Dental Listing records and Dental Service Provisions.
- Ultimately, this work will support more efficient, accurate and centralised management of Dental Listings and Service Provisions.
- We will continue to see significant enhancements across the next two phases scheduled for 2023/24 and 2024/25 of planned Dental development work.
