Area (ii)	Contractors Update
A) How Contractors will ensure that the appropriate level of packaging is used and, where applicable, packaging is made out of recyclable material which can then be further recycled.	
B) Whether the Equipment parts can be recycled and the use of virgin products is kept to a minimum which make up the final product.	
Area (iii)	Contractors Update
A) Contractors' approach to energy reduction in manufacturing of Equipment, including reducing the KgCO2 equivalent produced in the manufacturing and assembly of the Equipment (raw constitute parts to final product).
